

261006 – Item 6 - DNP Report

We received a presentation from a Youth Ranger who joined the programme at the age of nine and has now reached its upper age limit of 17. She is currently an apprentice with Forestry Commission England. As a thank-you to DNP for its continued support, she presented an offer to be raffled to raise funds for DNP.

People who are passionate about Dartmoor can once again help shape the National Park's long-term ambitions through a major new public consultation. The consultation launches on Monday, 12 October. People can have their say by completing a questionnaire on the website; paper copies will also be available from the office at Parke. The plan will cover the period from 2027 to 2032.

The review of the [Partnership Plan](#) aims to establish a comprehensive set of outcomes and targets, setting out how collective efforts will secure a thriving future for Dartmoor and safeguard its unique qualities.

Dartmoor is an iconic landscape of tor-topped moorland, river valleys, rare wildlife, rich archaeology, varied geology, upland farming and ancient customs. It is also a living and working environment, shared by a wide range of landowners, land agents, commoners, farmers, charities, businesses, recreation organisations and communities.

We also said farewell to Pamela Woods after 12 years of service to DNP. She served as Chair of the Authority from 2019.

Cllr Mike Jeffery
